

Platform Map

The software D+T runs today, and where the Kāinga Ora interface and Kāinga Ora users connect to it. The job management system stays the system of record, and D+T's own products sit on top of it.

Hosted on Google Cloud in the Sydney region

Node.js and PostgreSQL with queued background workers

Integrated today with Xero, Postmark, SMS providers and Slack

Every action logged with the user and the time

Built and supported by D+T's own development team
